

MASTER WORKS™ HAND DISPENSERS

INTRODUCTION

The hand dispensers are offered to enable simple and clean handling of Master Works M Series products.

These hand dispensers will be of particular benefit to users who require mixing smaller quantities of material on a frequent basis. For example in model shops, for pattern makers, producers of small castings and general applications.

FEATURES

- All components are non-corrosive
- Single action bottom lift pump
- Can be wall or bench mounted
- Easily dismantled for cleaning

APPLICATION

The hand dispenser unit is supplied as a two-component package with wall mounting bracket. One pump is for the A component and the second for the B component.

Whether wall or bench mounted the unit is designed so the pump tubes can be released and then slid easily through the fixing bracket.

This enables the user, having firstly prepared the Master Works material, to cut a hole in the plastic lid of the delivery bucket and slide the pump into the bottom of the container.

TECHNICAL INFORMATION

Dimensions:

Pump Height	46.5 in / 1180 mm
Width of handles	31.5 in / 800 mm
Depth of mounting plate	9.8 in / 250 mm
Width of mounting plate	13.4 in / 340 mm

Capacity:

4.2 oz per stroke / Circa 125 ml

Therefore:

Master Works M1 Component A - two strokes

Master Works M1 Component B - one stroke

2(A) +(B) = 12.7 oz / 375 ml

(approximately 1.43lb / 650 grams)
